# Transport solutions and customs clearing

We are focusing on multimodal shipments of heavy-lift and project cargoes, operating worldwide through our branches. Chandler offers its customers turnkey transport solutions and customs clearing on the following trading routes: Europe-Russia, Central Asia; USA-Russia incl. Far North and Polar regions; USA – Europe, including offshore platforms of the North Sea. Road Haulage routes of Europe-Russia-Europe.

# Oversized & complex cargo delivery

During the years of its activity, Chandler has introduced a reliable system of oversized & complex cargo delivery from any part of the world to the final consumers, using all means of transport:

- road
- rail way
- sea/river incl. ferry lines
- air

# Projectlogistics and Engineering

Transport of the equipment for oil and gas industry.

Transport of energy blocks for hydro, thermal and nuclear power plants.

- Development and implementation of complete logistics solution
- Cargo consolidation up to 1.800 tons per unit
- Projects preparation on road for load up to 1.000 tons

# Ship Brokerage and Charter Service

---

As independend charter specialist we offer you booking of whole charter vessels and ships' holds

Chandler Team offers you professional transport solutions and takes care of all formalities and details regarding booking of vessels and ships' holds. We are please to answer any question about shipping

Chandler Group has representatives in following ports:

- Houston (USA )
- Hamburg, Kiel, Luebeck (Germany)
- Antwerp (Belgium)
- St. Petersburg and Ust-Luga in Russia
- Incheon (South Korea)

If necessary in any other port worldwide

# Multimodal transport

We offer concept and implementation of global multimodal transport solutions with involvement of various transport means and organization of additional logistics services

# Delivery of LLG Platform to Sabetta (RU) for Entrepouse

Loading:	Port Kaliningrad (RU)
Place of discharge:	Port Sabetta (RU)
Preparation period:	Autumn 2016 - actual
Client:	Entrepouse

Volume of the project cargo is 155.000 freight tons

Heaviest cargo : 4 x LLG Platform (weight of each 730 tons)

Dimensions: LWH – 42 x 25 x 17 m

# 650.000 Freight Tons of Cargo in Port of Zeebrugge, BE

Controlling of consolidation:  
650.000 FT of cargo, about 40.000 packing units  
Incoming t / s: 42 vessels, more than 2.000 semitrailers  
Departed t / s: 46 vessels  
Realization: February 2016 – actual  
Client: Yamal LNG

In scope of the contracts of coming and leaving vessels, loading and unloading speed and list of priorities is verified. Daily/weekly reports are done based on digital data that are in compliance with individual customer's demands.  
Daily updates concerning loading speed and photographs of the loading/unloading processes are provided.

Уважаемый Владимир Станиславович!

Компания Чандлер ГмбХ организовала в 2014 – 2015 гг. доставку негабаритных и тяжелых грузов из различных портов Европы в морской порт Сабетта для строительства завода СПГ. Доставка всех видов грузов была организована в срок, в пределах установленного бюджета.

Компания Чандлер ГмбХ показала себя надежным партнером, обеспечивающим высокий уровень услуг и обслуживания своих клиентов, а также качественный сервис и поддержку.

Высокий профессионализм менеджмента, его нацеленность на быстрое и качественное выполнение поставленных задач позволяют рекомендовать компанию как надежного делового партнера.

# Delivery for the National Space Centre in Astana, Kazakhstan

Loading: Inland Port Liège to

Transshipment : Port Antwerp, Belgium,

Port Archangelsk, Russia

Inland Port Omsk, Russia

Place of discharge: National Space Centre in Astana,

Kazakhstan

Client: Airbus Safran

Preparation period: Oct 2016

Equipment : High-tech equipment for the construction of the National Space Centre in Astana, Kazakhstan. Radius of the four biggest components (segments) of the Thermal Vacuum Chamber Systems was 9,5 m.

Service: Transport route from the Inland Port Liège to Antwerp, Belgium, where the cargo was transhipped to an ocean vessel, from where it was shipped to Port Archangelsk, Russia for customs transit und transshipment to an inland-ocean-vessel. The vessel continued its transportation through the North Sea to the Rivers of Ob and Irtysh to the Inland Port Omsk, Russia. The transport from Inland Port Omsk to Astana was delivered by road transportation

Project: Delivery of the thermal vacuum camera for construction of the National Space Center in Astana, Kazakhstan.

Dear Sirs,

By present letter the Airbus Safran Launchers company expresses the gratitude to the transport and logistic company Chandler GmbH for execution of transportation of the equipment within the above project.  
Despite the considerable dimensions of the equipment and complexity of a route the company Chandler perfectly coped with the objective.

Sizes and weight of 4 largest parts of the Thermal Vacuum Chamber System:

- Vessel segment 1 including thermal shrouds and catwalks. Ø 9500 mm - High 5000 mm - Gross weight of 37500 KG
  - Vessel segment 2 including thermal shrouds and catwalks. Ø 9500 mm - High 5000 mm - Gross weight of 36500 KG
  - Front door including thermal shrouds. Ø 9000 mm - High 2100 mm - Gross weight of 25500 KG
  - Rear door including thermal shrouds. Ø 9000 mm - High 2120 mm - Gross weight of 21000 KG
- Route: Liege, B – Antwerp, B – Arkhangelsk, RU – Omsk, RU – Astana, KZ

Thanks to the logistic scheme offered by Chandler GmbH with use of different types of transport. The equipment was delivered on time and in good conditions to the final site.

We recommend the company Chandler as reliable and professional partner.

Philippe-Olivier Privat  
SBK Project Manager

# Delivery of Refinery to Volgograd

Duration: April-December 2014

Cargo: Oversized heavyweight equipment for refinery construction for the Lukoil company in Volgograd (RU)

Total weight and volume: 8.039 t, 43.500ft

Cargo features: 2 reactors **845 t** and **1.1116 t** (37m x 8,5m x 7,3 m), and column **500 t** ( 67m x 7,2m x 7,5 m)

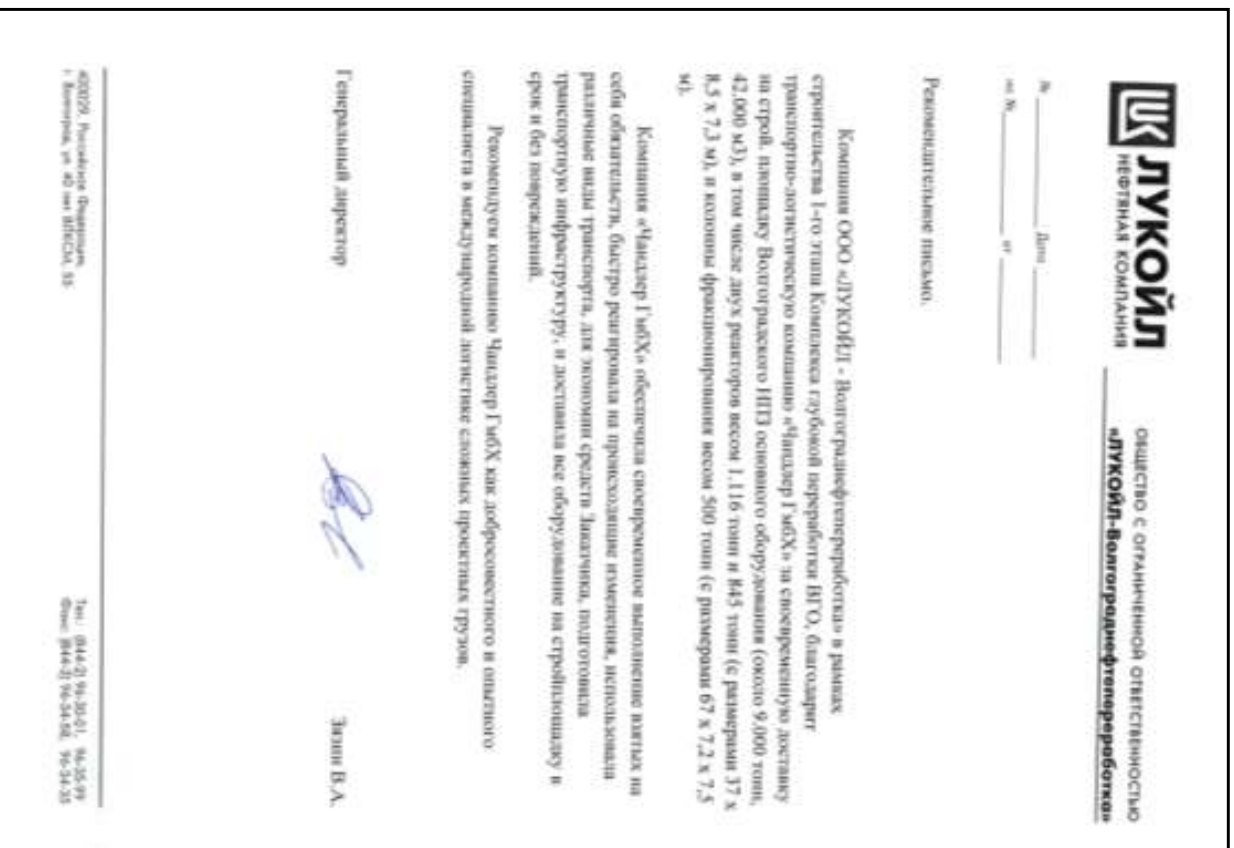

Client: Lukoil

## Solution

- Several routes developed, diverse transportation modes, incl. river-sea vessels, special pontoons and various types of specialized trucks
- Customized barge-to-barge transshipment of heavyweight 1116 t reactor – first time in Russia
- Provisional works of infrastructure development for heavy-lift cargo – 6 months before the transportation
- Engineering survey of entire route from Ro-Ro jetty on the Volga River to the refinery
- 160 meter length level consolidation, 1052 meter length of road construction

**LUKOIL**

# Delivery of Refinery to Volgograd Heaviest cargo superheavy reactors (500 t, 845 t, 1.116 t)

# Delivery of GE Equipment for Power Plants

## Tashkent Gas-Turbine Power Plant

Loading: Port Charleston, /Albany (US)

Linz (AT)

Transshipment: Constanta (RO) /Kuryk (KZ)

Duration: March – May 2014

Cargo: Gas turbine (11m x 5m x 5m, 279 t)

Gas turbine generator (9 m x 5m x 4 m, 225 t)

+ equipment

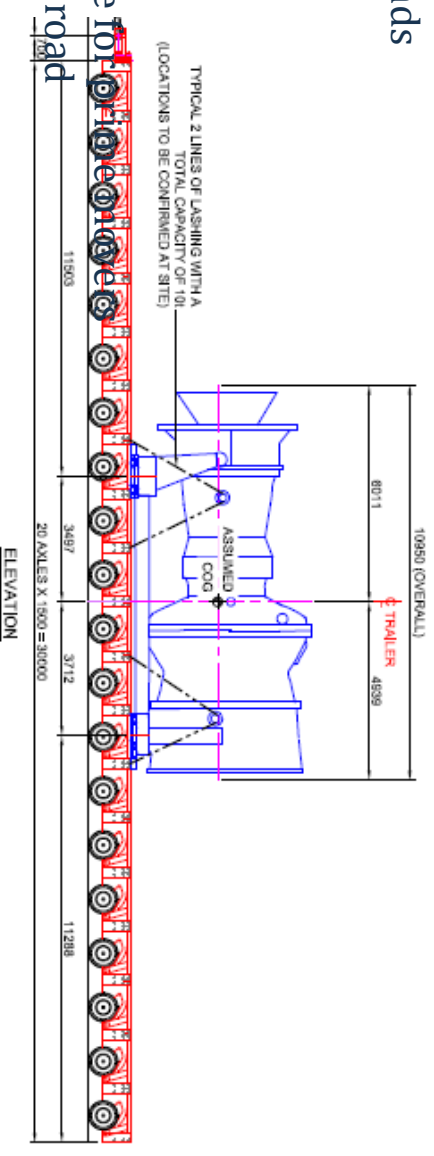

## Route special features through the territory of Kazakhstan

- Complicated infrastructure, bad quality of roads
- 300 km without asphalt or similar covering
- Several long uphill and downhill road areas

## Solution

Mobile construction group, preparing the route for the transportation process, by means of road reconstruction

# Delivery of GE Equipment for Power Plants

## **Surgut Power Plant:**

Shipping of General Electric power equipment for construction of 2 new power units at **Surgut Power Plant-2**

Main details:

- 3 ocean vessels, 10 vessels river-sea type, 10 barges and more than 450 trucks and low-beds were used for shipping of 15,000 tons / 45.000 cbm of equipment
- the Ro-Ro jetty and heavy duty road were built
- 2 barges for Ro-Ro unloading of super heavy cargos were rebuilt

## **Nizhneartovsk SDPS:**

For delivery of General Electric equipment to **Nizhneartovsk SDPS** Chandler has built Ro-Ro jetty and temporary road till the building area, built the jetty the mouth of the river Ob in Salekhard, mounted crane system SHEVR with special-purpose to lift cargo with weight up to 500 t.

Delivered general and over-sized cargo: 1.590 tones, 9.800 m<sup>3</sup>

# Delivery of GE Equipment for Power Plants

- Certified for transportation of GE Equipment since 2008
- 684 oversized units with the weight of over 100 tn each during last 10 years

To whom it may concern:

A GE Customer introduced Chandler Logistics to me in 2008, during a search for logistical support with GE projects in Russia. Chandler Logistics is currently a vendor of ours in a challenging project in Surgut Russia.

Chandler Logistics has consistently shown a high level of knowledge and professionalism, which proved to be highly effective. This firm has already moved several out of gauge cargo from both Italy and the Netherlands on time and without damage. The level of communications was stellar leaving no question unanswered. I will continue to rely on their services in the future.

I would highly recommend Chandler Logistics, they have shown themselves to be a highly ethical logistics professionals and able to perform. Any company would be fortunate to have a firm of this caliber work with their organization.

Please do not hesitate calling me should you have any questions.

Best regards,

**Erik Vandenberg**

Hello Vladimir,

Great news on the successful delivery of the GT to Tashkent. I can not tell you how often the variant had been discussed in the past few years, I think only Chandler could finally pull it off. Congratulations to you and your team, look forward to seeing those pictures.

Kind regards,

# Delivered volumen of cargo from 2007 to 2017 over 1.950.000 FT some references

Dear Sirs and Madam!

To our entire satisfaction, the company Chandler-GmbH have done all the logistic operation of transportation of equipment and components for plants of construction materials to Egorovsk in 2012 and Dagestan in 2013 within the framework of the projects.

Chandler company has consistently shown a high level of knowledge and professionalism, which proved to be highly effective. The company has already moved several out of gauge cargo on time and without damage. The level of communications was stellar leaving questions unanswered. I will continue to rely on the future and consider collaboration with the company in the different projects to CS and Asia.

I would highly recommend Chandler GmbH, they have shown themselves to be a highly ethical logistics professionals and able to perform.

Mit freundlichen Grüßen /best regards

To whom it may concern

Intertorg LLC on a few occasions had business contacts with the freight forwarding company Chandler GmbH, and used their services for transportation of equipment, as well as a full package of logistics and brokerage.

One of the latest projects was shipping from Germany to Russia of locomotives and some heavy auxiliary equipment for a major tunnel construction project in Moscow.

The performance of Chandler GmbH was professional. The oversized and bulky cargo was delivered to the end user fast and without any damage to the goods.

Intertorg LLC is confidently recommending to those who need it, service of the Chandler GmbH as a highly professional and reliable freight forwarding company.

Yuri Rocklin  
President  
Intertorg LLC

# Chandler

Chandler Shipping has been operating on the international logistics market since 1996.

A long-term experience in cargo transportation of any category and complexity (including project logistics for oversized cargo delivered by road, railway, water and air), forms the competitive advantage of the company.

Staff of Chandler is highly qualified and skillful in project logistics with the work experience from 10 to 40 years.

# Chandler
